Compatibility with Workflow Extension

Posted by RandyF - 2010/10/13 21:51

Fatica Consulting (fatica.net) has developed a version control/staging extension for workflow management called Workflow Extension. Edwin gladly took the time to test Workflow with JMS and found the two to be compatible. I thought I'd pass this along in the forum in case anyone else is searching for this.

(I'm not affiliated with Fatica; I'm just passing along information that might be useful to someone.)

It is released now in JMS Multisites 1.2.40 and its patch definition 1.2.46
