Jms Multisite for joomla (All Edition)

- In some circumstances, MySQL may return the description with a syntax for MySQL 4.x (in case of upgrade of MySQL to 5.5).

In this case, this result with invalid CREATE TABLE syntax.

In case of MySQL 5.1+, ensure that create table use ENGINE=xxx instead of TYPE=xxx

- Improve the "Set Default Language" when the plugin / system / language filter is enabled.

In this case, the JMS "set default language" is applied only the first time and after, this is the language filter that is responsible of the language code.

- Allow updating a website definition from the front-end when the "Maximum Site" is reached.

The verification of the "Maximum Site" is only performed in the case of a new site and no more during the update.

Bundled with Patches definition 1.3.19

- Add joomla 3.2.0 RC compatibility.
