Jms Multisite for joomla (All Edition)

- Add verification that memory is >= 128 MB in the JMS Tools menu. Blank screen can be resulting of a too small memory.
- Add trim on the "manage site" filter field.
- Add possibility to keep some sharing untouched for some extension that have a specific sharing algorithm.

Case of Hikashop that create internal views for the reporting and that can not be touched by the JMS sharing processing.

- Avoid that the "Set new default menu, template and language" is processed during the installation to avoid PHP Fatal error due to call of functions that does not exists in the Joomla Web Installer.

Bundled with Patches definition 1.3.22

- Add JMS Tools (install) definitions for :
 - 2jgallery
 - 2JToolBox
- Update Joomla 1.5 sharing definition for:
 - Hikashop to allow specific payment and shipment
