

Jms multisite for joomla version 1.3.40 (All editions)

- Fix the pagination under J3.2+ to allow displaying the limit counter per page available.
Applied on the "manage site", "template" and "maintenance" menus but also on front-end list of slave sites.
- Add the pagination in the footer of the "maintenance" menu .
- Fix a PHP Fatal error that may happen in the "maintenance" menu when the connection to the slave site DB fails or is invalid.
- Remove some PHP Strict messages that may occurs when displaying the list of JMS templates and displaying the toolbar.
- The "check for update" does not work anymore due to a bug introduced by Joomla recently.

This affect both Joomla 2.5 and 3.3

We proposed a fix that can be retrieved at

<https://github.com/joomla/joomla-cms/pull/5238>

Bundled with Patches definition 1.3.36
