

Jms multisite for joomla version 1.3.44

Fix a PHP Fatal error that may happen in rare case during the installation.

Bundled with Patches definition 1.3.40

- Add the patch that implements the Pull Request 5238 that is still not fixed in Joomla 3.3+
See <https://github.com/joomla/joomla-cms/pull/5238>
This fix is required to make the JMS "check for update" working properly.
- Add JMS Tools (install) definitions for :
 - jCenter suite: jAffiliates, jAuction, jBounceback, jDefender, jFeedback, jLinks, jMarket, jSubscription, jTickets, jVouchers
 - RSFiles
- Add Joomla 3.3/3.4 sharing definition for:
 - jCenter (including partial sharing on the categories, products and orders)
 - RSFiles
