Compability with crosstec contentbuilder

Posted by JerryCurwen - 2012/02/07 09:42

Hello,

yesterday i have installed the component "content builder" from the producer crosstec.

If you want that we add the definition of an extension in the JMS Tool menu, you can send us the extension in the attachment of an email.
We will review it and potentially will add it in a next release of JMS.

See "contact us" for the email address.

Hello edwin2win,

i have send you an email with the component in the attachment. Is it possible that my email is slipped in your spam folder?

I would be happy to hear from you.

THX

JerryCurwen
