Jms multisites for joomla version 1.3.54

All Editions
- Update the maintenance menu to add joomla 3.4.3 MySQL definition.

Bundled with Patches definition 1.3.50

-   Add Joomla 3.4 compatibility when installing an extension from a slave site.
    It consists in adding the declaration of the Registry name space to allow the JRegistry alias class to be defined.
    This error may cause a fatal error when trying to install an extension from a slave site.
