Share Virtuemart with JMS

Posted by digital - 2013/03/04 11:10

Hello,

is it possible to share the Complete Virtuemart database with paymant, shipping, product, shoppergroups etc. and having indepent Joomlas with own Articles and users.
example:
User1 in Joomla1 and User2 in Joomla2 both users in VM shoppergroup3 in Joomla3 ?
In all client Joomlas we want to show Products from Joomla3 and having indepently Joomla Articles and Individual Joomla Users.

==========

Yes you can share the users between the websites and also share the VM content between the websites.

Sharing the content of an extension in JMS consists in sharing the MySQL tables that are used by this extension. This is possible for a limited number of extension because this require to keep a consistency of the data.
