

Jms Multisite for joomla version 1.3.68 (All Editions)

- Add Joomla 3.8 compatibility
- Add the Joomla Update feature under Joomla 3.7 or higher.

In the about menu, a new "download ID" info is added to allow JMS get the update of itself when a new release is published.

It is required that the extension is registered by the person who has purchased the product.

The download ID is automatically collected by JMS when the product is registered.

When the download ID is attached to the product, JMS adds the info into the Joomla Update to allow including it into the list of the extensions to check for update.

Bundled with Patches definition 1.3.63

- Add patches for Joomla 3.8
