Problems with AceSet Posted by KingoftheRoad - 2010/03/12 08:08
Hi Edwin,
I experience some problems with AceSef
The joomla/administrator/components/com_acesef/configuration.php seems to be shared by slaves master. All my configuration at slave site seems not effective.
2) I cannot see the screens of URLS in AceSEF.
Original AceSef Screen:
http://www.jms2win.com/images/fbfiles/images/AceSef_Original_800.jpg
JMS AceSef Screen:
http://www.jms2win.com/images/fbfiles/images/acesef_800.jpg
Pls advise.
Many thanks.
Seth

Check that you have installed the JMS patches.

There is one for AceSEF configuration.php file present in their directory.
