JMS compatible with FLEXIcontent / FLEXIaccess?

Posted by pctx - 2011/05/16 19:35

Hey all,

So we have a website that is coded heavily in FLEXIcontent/FLEXIaccess and would break if we didn't have FLEXI as one of our extensions as it has its fingers in EVERYTHING on our website.

We're looking at purchasing JMS to have a production site (one VM) and a dev site (another VM) but I wanted to check and see if FLEXIcontent/FLEXIaccess were covered in the latest version of JMS 1.2.x.

Thanks!

-Aaron

These extensions are defined in the jms tool.
See the list of extension here
http://www.jms2win.com/en/list-of-extensions?view=extlist&id=269&Itemid=53

Gotta love replies like this. While yes it does provide the information I need (thanks btw), it is rather annoying that you just don't answer the question.

Looks like we'll have to look elsewhere for syncing. :/
