Ecwid eCommerce running with RokEcwid

Posted by Pelmoggian - 2012/01/25 11:38

Hi,

I installed Rocketthemes RokEcwid 1.3 to integrate my Ecwid shop into Joomla 1.7.3, plus the latest version of jms.

However, after installation in the master, and going to 'tools' I found that the component, three modules, and plugin, were marked as

'Risk to define this extension. The tables to replicate are not defined in JMS. Contact the JMS support to propose the definition of this extension in a next release of JMS.'

It's no biggie to install in the slave sites, but just to bring the extension to your attention for future integration.

This extension is available for free at :
http://extensions.joomla.org/extensions/e-commerce/e-commerce-bridges/10720?qh=YToxOntpOjA7czo1OiJlY3dpZCI7fQ%3D%3D

OK, I will have a look to add this extension in a next release of JMS
