Jms multisite for joomla 1.3.0 RC1
All Editions

- Add Joomla 3.0 stable compatibility
  - Fix Mootool call due to deprecated functions removed.
  - Partially fix css rendering due to plenty of style removed in 3.0 (tabs, list, ...)
- Fix some PHP Strict message
- Add possibility to set a new "Meta Description" and "Meta Keyword" in the back-end when creating a website.
- Improve the maintenance menu to allow comparing an extension with its "master" or "template" website DB structures.
- Fix a dynamic MySQL user creation when the permission to create views is not allowed.
