File missing from installation set

Posted by SecondhandBuddah - 2013/03/18 10:43

Hi,
Im busy installing the latest version of Multisites in Joomla 2.5. and Im getting the following error message during installation:

JInstaller: :Install: File does not exist
D:xampphtdocsxxxxxxtmpjms2winadminpatchespatches_files_j31.zip

I checked, and the file is not in the folder.

Can you please advise?

Thanks,
Robin

I confirm this issue that is present in JMS 1.3.08 basic edition.
It is fixed in JMS 1.3.09
See FAQ for the procedure to get the latest version.

Thanks Edwin,

Multisites installs now.
