This Jms Multisite version 1.3.07 add a partial compatibility with Joomla 3.1.

Under Joomla 3.0 & 3.1:

- Fix an issue in the installation of a component form the JMS Tool menu.
   Issue due to a column removed in the joomla #__menu table. The column "ordering" is removed in in j3.0
- Fix an issue during the re-installation of an extension in a slave site.
   A Fatal error may occurs during the manifest version number verification.

Under Joomla 2.5 and higher

- Fix the "new default menu" to add in joomla both the specific language but also the default wildcard (*) language with the new default menu value.

It is also bundled with Patches definition 1.3.05

- Add JMS Tools (install) definitions for :
  - JomWALL
- Add Joomla 1.5 sharing definition for:
  - AceShop
  - JomWALL
