Problem is don´t fix code
$db=JFactory::getDBO();

Writing this code before problem
$db=JFactory::getDBO();
$db->setQuery($query);

_____

The screenshot are not available.
If you have an error message, please provide the message in clear.
or provide more detailled description.

As you have posted several message arround the "Partial User Sharing", I just hope that the other message are related to the same question.
