

Jms Multisite for joomla (all editions)

- Joomla 3.x compatibility
- Fix the "/installation" patch installation when the original "/installation" directory is restored.

The issue was that the JMS patch for J2.5 was restored under J3.x that has as result that the patch required was not present.

Bundled with Patches definition 1.3.11

- Fix the localhost behavior when using the "cookie".

The issue was that it was not possible to switch on a fresh slave site that require a "Joomla Web Installer" and also come back on the master website when a slave site is present.

- Add JMS Tools (install) definitions for :
 - MijoSEF
