can not uninstall the JCE plugin

Posted by dalusoha - 2009/04/29 05:37

---

i have patched the patch you supplied newly for the JCE installation, but when i want to install some JCE plugins such as imagemanger extended, file manager, capton manager, it still showed
the directory already existed.
what is more, i can not uninstall the already installed plugins, it showed " you are not authorized to view the source" when i tried to uninstall them.

what is the problem?

use the following to enter the backend of slave site

user: ******
password: *****

thanks
