This new JMS multisites patches definitions

- Adds a patch definition for the single sign-in to allow restoring the session data when some platform ignore them for sub-domain.

This rescue procedure check that session data is correctly restored by the server when the Joomla session is shared.

If the session is not restored by the server, this rescue procedure consists in rebuilding the missing session data based on the infos stored by joomla in the session table.

- Adds a JMS Tools (install) definitions for :

* Jom Comments, Simple Image Gallery Plugin, Phoca Maps, Phoca Restaurant Menu, Frontend User Access, CK Forms, JForms, RS Forms!Pro, Plugin Multisite ID, Leads Capture

- Adds the sharing definition for:

* CK Forms
