error in registering components/ plugins [solved]

Posted by angello - 2012/09/16 15:51

Sorry!!!
I had to log in first at your website,
than everything was ok.
Its registering ok now.

I bought the largest jms from you today. + all plugins/ modules..

Using Joomla 2.5 (the latest)

Website: http://www.gse-schools.com

I am trying to Register each package like:
Multi Sites Content

All components/ plugins/ gives the same result.

I get this message:
An error is occured during the registration.
Missing registration information. Retry and if the problem continues, contact our support.

Please help me!

Kai Pettersen

Send me by email the product ID that you can find in the "settings" menu or "about us" menu of the extensions.

I will cross-check our DB for the registration.
