Jump a recursive process)!!!

Posted by miquelvg - 2012/12/10 08:56

From the template I created the slave site,but when I connect jump as a recursive process.

www.mydomain.com/multisites/u43parada1/index.php/es/index.php/es/index.php/es/index.php/es/index.php/es

("/index.php/es/index.php/es/index.php/es")

Thanks!!!

Check the plugin that are enabled.
I suspect that you have a loop in the plugin "language switcher" or similar that would redirect infinitely.

Can you describe the setting of the slave site.
Do you use multi languages ?
Did you setup several menus for different languages ?
....

Hello,
I use two languages at the moment i have removed the flags but the plugin is activated.

And I use two menus (depending on the language) giving access to the list of stores.

Thank you very much

General
Lista de dominios o subdominios válidos:

http://{site_url}
http://{site_url}/multisites/{site_id}

3

Plantilla del sitio(*)

AI sitio ID (*)
{site_prefix}{user_id}

http://shop.servicesbcn.com/multisites/p005850

_____

The problem occurs when there is a default language and default menu with the default language.

Here shipping template configuration.

Thanks!!!

_____

I will try reproducing it based on the info that you have provided.

The look that I had to the URL that you provided show a URL like
.../p006850/index.php/en/index.php/en/index.php/en

We can see repetition of /index.php/en

_____

Good morning,

Excuse me for being unable answered before, i can determine that the problem of recursion is produced by not report the configuration templates possible subdomain.

Thanks!!!
