Error HTTP 500 in Maintenance tab

Posted by MaxDM - 2013/01/02 22:01

Hi there.

I just upgraded JMS from previous version (1.2).
Now it run in 1.3 basic.

i used the old version for about one year and i never had issues.
The Upgrade process worked fine.. without errors.

All parts of the component (sites, tools, templates etc..) are working without problems but the Maintenance tab return me the generic http 500 error.

I know... it's so generic but... anyone have an idea?

I'm run in:

Joomla 1.5.26
php 5.2.17
Apache 2.2.16
mysql 5.1.66-0 + squeeze1

Thank you very much!

Can you give me the full version number of JMS.
Is it the JMS 1.3.01 Basic ?

The JMS 1.3.0 RC1 had an Internal Error that is normally fixed.

I will try reproducing on Joomla 1.5.26 and JMS 1.3.01 Basic.

Thank You for your answer.

Yes.. i'm running in 1.3.01 - basic

Let me know...

Thanks again.

_____

I have been able to identify a bug but in my environment that didn't generate an Internal Error.

There is a patch that is not correctly detected on Joomla 1.5 and that I will fix in JMS patch definition 1.3.01.
The patch "missing" patch will install a missing library under joomla 1.5.

_____

ok .. I will try with the new patch definition 1.3.01 and i'll let you know.

Thank you very much for your help.

_____

You can get the latest JMS 1.3.02 that also include fixes that I have identified when using PHP 5.2.

See the FAQ for the procedure to get the latest version
