Error 1142- sharing db to another server db.

Posted by uupost - 2011/01/18 15:23

Hello,

i am having this error, when i create my multisites via jms.i want to know this error come exactly from where. how to debug this error? May i know how to fix this error via jms admin application or via database?

Error(1) query . DB Error: ANY command denied to user 'xxx'@'%' for table 'yyy1_users' SQL=CREATE OR REPLACE VIEW yyy1b_users AS SELECT * FROM `xxx1`.`yyy1_users`

==========

As you could read several times in this forum, the error "command denied to user" means that you didn't provided a MySQL User that has the privilige to create and show view.
If you are using a shared hosting, perhaps you have to contact the support to ask them grant your MySQL User.
If you have a PHPMyAdmin root login, I suggest that you have a look in the tutorial video 0.b slide 35 that show the privileges that you have to provide to your MySQL User.
