Yes you can use VirtueMart 1.1 and VM2 with JMS.
Our www.jms2win.com website is using VirtueMart and is also a slave site.

hi there

i have a question to ask about multisite and virtuemart.

the scenario is:
1.im already create a site with multisite and virtuemart.
2.im already create a default site and assign a template and install virtuemart in there.
3.all running perfectly.
4.then, i already create a slave site.this slave site running perfectly also.in my slave site administrator already have virtuemart.
5.but,the problem is,when i click at virtuemart menu from slave front end site,this notification revealed : "An error has occurred.
The requested page cannot be found.
If difficulties persist, please contact the System Administrator of this site and report the error below.
#404 Category not found"

my address:

As mentioned in the previous post, we can login in your server if you purchase the billable support. This is not part of a free service to do the administration of your website.

Our www.jms2win.com website is using VirtueMart and is also a slave site.

In your list of extensions results Virtuemart sharing supported on Joomla 1.5 and 1.6 , i suppose it is referred to Virtuemart 1.x only.
I can see also HikaShop sharing supported on all Joomla versions, up to 2.5 .
Can you please update this list with actual sharing possibilities of Virtuemart2 tables in JMS 1.3 on Joomla 2.5 ?

Thanks

_____

As you have JMS, when you go in the JMS template menu and create a new template, in the sharing tabs you can see if VM can be shared depending on the version.

We will update our website the next time that we will publish the new release.
