Users sharing setup problem

Posted by andrew@somotweb.vn - 2011/04/14 10:42

---

hi

We've setup for users sharing as per your tutorial: "How to share the users and extensions betweens websites ?" No 16

Get error display after create slave_1.a

Error(1) query . DB Error: CREATE VIEW command denied to user 'masteral_jms'@'localhost' for table 'm12slslave_1b_users' SQL=CREATE OR REPLACE VIEW m12slslave_1b_users AS SELECT * FROM `masteral_jms`.`m12sl1_users`

Seems like we have not setup correctly the permissions/access rights for the database tables for the Slaves sites. Kindly advise where we may have done wrongly in the cPanel to setup the database/table user accounts/permissions.

Will appreciate very much an early reply and assistance.

Thanks very much for a great product.

This is a "command denied to user" error returned by MySQL and discuss plenty of times in the forum. In example

http://www.jms2win.com/en/forum/10-plesk-configuration/6271-error-1142-sharing-db-to-another-server-db#6271

Review the privileges of you MySQL user to give him the permission to create and show views.
See also the tutorial video 0.b - slide 35 that show how to modify the privileges with PHPMyAdmin.
