Dear Edwin,
I see in extension list you did not add JoomBah Job extension for joomla 2,5 so i send it (new version for joomla 2,5) at the attachment for review and perhaps it can share in joomla 2,5.
Best Regards
Reza

I have well received the extension in the attachement of an email and reviewed it.
I have added its sharing definition for Joomla 1.6, 1.7 and 2.5 as the package that you sent me correspond to all these version.

This will be available in the next release JMS 1.2.91
