multisite not working

Posted by dickon32 - 2017/01/22 09:36

When I make changes to the product of virtuemart, those changes are not reflected in the slave sit.

Any help will be appreciated.

To have the content reflected, you have to share the content of VirtueMart.
This is a decision that must be taken when you create a slave site.

Verify with the JMS tools if the tables are shared.
Probably not.
See the tutorial video #16 that explain how to share the users.
https://www.jms2win.com/en/tutorial#jms12x-16
This is the same method with any extension that is can be shared.
