use CB facebook plagin and CB twitter plagin. Posted by rezamoghtada - 2011/07/02 11:05
Dear Edwin, I would like to share Community Builder with my different website i shared by JMS multisite and also us CB facebook plagin and CB twitter plagin, in master site i haven't any problem but in Slaves sites i have problem with IPA key, Could you help me please. Regards Reza
Re: use CB facebook plagin and CB twitter plagin. Posted by edwin2win - 2011/07/03 11:37
Which is the problem with the IPA Key ?
Do you need several key (one per website)? If yes and if the key is present in the page somewhere, you could perhaps use the Search/Replace plugin to replace a specific keywork with the value of the IPA key corresponding to your domain or subdomain. See Search/Replace plugin http://www.jms2win.com/en/component/docman/doc_details/13-searchreplace-utility
This is a method that we already used for Google Map key.

Sorry but I don't know the constrain related to the Facebook and Twitter key.

use

JMS, multisite for joomla - Joomla Multiple Sites and user sharing Generated: 17 September, 2025, 00:59 I don't know if there are domain, subdomain related. See facebook and twitter for that.
