joomla 3.4.3 login not working

Posted by Garfield - 2015/08/14 13:36

_____

Hi
I made an update of Joomla 3.2.2
on Jommla 3.4.3 with MultiSite 3.5.4
Now that's frontend and the backend administrator login is not working

The login in the master slave goes

I have already made a new installation. Without success. The login does not work

Thank you for quick help

Hi
ich machte ein Update von Joomla 3.2.2
auf Jommla 3.4.3 mit multisite 3.5.4
nun geht das frontend und das backend Administrator Login nicht

Das Login im master slave geht

Ich habe bereits eine neue Installation gemacht. Ohne Erfolg. Das Login geht nicht

danke für eine schnelle Hilfe

_____

If you did an upGrade from Joomla 3.2.2 to Joomla 3.4.3 then ensure that you have removed the /installation directory that was present in your Joomla.
In effect, the /installation directory were restored for J3.2.2 and not for J3.4.3
Once the /installation is removed, you can go in the JMS patches to restore the J3.4.3 /installation directory.

When done, you can create your new fresh slave site using the J3.4.3 Web installer script.

That should solve your issue.
