Do i need to update JMS for joomla 1.5.23?

Posted by rezamoghtada - 2011/09/05 09:58

Dear Edwin,
I have to use Joomla Version 1.5.23 because of some main extensions i am sharing with many websites, also these extensions works only with joomla 1.5 and not new version of joomla.
My question is: JMS update at list each month one time and also i have to still use joomla 1.5, Do i have to update JMS even when i am using joomla 1.5?

No it is not required to update JMS when you are satisfied with your current version.

Most of the update that we did mainly concern the compatibility with Joomla 1.6 and now with Joomla 1.7.

Just have a look in the "change history" to have a description of the updates.
