Deprecated message does NOT means not working.
This is a message reported by PHP 7.
We kept old syntax to remain compatible with old environment.

Concerning the Fatal error, it reports a maximum execution time.
I don't know what may cause this long time execution.
Did you tried increase the time.
Check the content of the file
/home/testing/stores/multisites/cs899/config_multisites.php on line 1

I suspect that you have a hack or something strange in line 1
