PHP 7 deprecation notice

Posted by schultz - 2017/03/02 10:15

Bonjour Edwin,

this is just to let you know about an deprecation message I am receiving.
You might want to fix this in a future release

Multisites for Joomla! 1.5.x, 2.5.x, 3.0.x
Version 1.3.63 - basic (Latest available: 1.3.63)
Patches definition Version 1.3.58 (Latest available: 1.3.58)

Deprecated: Methods with the same name as their class will not be constructors in a future version of PHP; Site has a deprecated constructor in ...httpdocsadministratorcomponentscom_multisitesclassessite.php on line 35

kind regards
Ruediger

We still have plenty of redefinition of constructor to remain compatible with older PHP.

In recent PHP like PHP 7, this is marked as deprecated but with the error level of the server, you can ignore those message.

So this is not critical.
