joomla 1.5.10 roadmap

Posted by Alter - 2009/04/02 11:34

Hi !

Is it that we can use the latest version joomla 1.5.10?
What is your roadmap for 2009 ?

thank you

JMS has already been tested with Joomla 1.5.10 and also a new JMS 1.1.18 has been delivered with original Joomla 1.5.10 inside.
Previous version of JMS also accept update with Joomla 1.5.10.

I am analyzing the possibility to propose extension sharing and in particular user sharing.
I expect also propose a replication of website into another DB and not only in the same DB as this is the case with current JMS.
I can not commit on date but I can say that will not be before june or july 2009.
I have already try develop such thing in jully 2008 and I have never publish because the result was not good.
