presale question

Posted by yaz - 2009/04/12 13:50

Hello,
I want to set up a multiple shop system where my visitors can create their shopping mall from the front end...does this component allows me to do so ?
Thanks
yaz

YES.
You can create a "Website Template" with will refere to a website where you will have pre-installed some component and for example the VirtueMart compnent.
After that, you can propose the possibility to create other slave sites based on this pre-installed webstes.

See video in tutorial step 13
