JMS Menu item extention NOT WORKING!!! with j 1.5

Posted by kkonline - 2011/03/13 04:58

The section on the right : Parameters (Basic) is empty..

IS this normal ?

NO.
I don't know which version your are using but see the tutorial video 0.d that illustrate the case of the Multisites Menu Items.
So that you can verify the expected result.
This show the result on Joomla 1.5 and is working perfectly.

We also recently published a version 1.1.0 that is now also compatible with Joomla 1.6

I confirm a bug in the Menu Item version 1.1.0 that were introduced when doing the compatibility with Joomla 1.6.

It is fixed in version 1.1.1
