Fast, reliable and efficient support

Posted by davidpolo - 2009/01/15 10:10

_____

We have had the typical situation where we had to deliver a project to a customer and had no idea about how to do that.

We discovered this component and decided to purchase it.

During the installation we consult the customer service and they did the installation with us, guiding us in every step that was done.

The customer service was just five star one I have to say

I definetly encourage everybody to try this component, since there is total support

Regards
David Polo
