Very good support

Posted by Patrick - 2009/02/10 05:36

Excellent product. With some clicks you quickly deployed hundred of Internet sites.

I met some problems to install it on local PC (for tests) because of virtual DNS with apache configuration (wamp server) but with very good support help, solutions were quickly found

Many thanks to the author for the netmeeting Remote Desktop on my PC.

Many thanks for time sharing on telephone

Best regards
Patrick (ssorry for my english)
