_____

We were the first university on Latinoamerica on use a central CMS, we were the first one on use multisite structure too. For that we use Joomla JMS from the first version many years ago and always have a good comunication with Edwin Cheront.
This is a great job, we implemented a strong CMS and we have more easy updates and administration.
We still need help ons some things but we are very satisfied with JMS and with support.
Very good product!

Ivan Llanos Bustos
Pontificia Universidad Católica de Chile
