JMS, multisite for joomla - Joomla Multiple Sites and user sharing Generated: 15 December, 2025, 10:17

slave site and Yootheme widgetkit Posted by mdadvice - 2012/11/11 11:38
I've installed a slavesite, but on this site Widgetkit shows "code" and not the interface (see image in attachment) - and it don't save anything. I've installed already the JMS patches for yootheme (widgetkit (60,-€!) Joomla 2.5.7 and widgetkit 1.3.1 (and it was not working with the previous version)
Can somebdoy help me further
Thnx
Re:slave site and Yootheme widgetkit Posted by mdadvice - 2012/11/12 15:33
Works now Fine - stupid of me: forgotten to patch
