# Disable share: artical,sections,category,

Posted by darkangel_kha - 2009/11/23 01:22

_____

hi

:P I have success of making a shared slave web site but i have a small problem,

i don't wan't to share artical,sections and category how i do that
i want the share to be with the users just the users nothing else:S

how i can disable these thing (artical,sections,category) , i cant find them in the tool's:(

_____

All depends how you have share the slave site.
If you have shared the whole website then you can not "disabled" parts or it.

If you have shared your slave site using the tutorial video 16 then theorically, you only share the users.
