Admin user of slave site

Posted by battisti - 2009/12/04 20:29

After i create a slave site all works but when i try to access the /administrator with the user admin and pass with i pass in the creation of my site the logoin dont work!

The user admin and the pass is in the table user of my slave site!

Some idea?

OBS: My username database is not compatilhated

First you have to check that you are login on the appropriate website.

Second if this is after website creation from the front-end, check that you don't have kept the original password.
