Upgrading from MultiSites Version 1.2.12 to 1.2.15

Posted by nniiccoollee - 2009/12/22 21:55

Hi ~

I purchased JMS in November and today when I checked patches in the Joomla admin, I received an updated patches definition (1.2.21) but MultiSites itself is showing version 1.2.12 with the latest available being 1.2.15.

How do I upgrade my component when neither Check patches nor Check for Updates seems to work?

Thank you!
Nicole

REEEEEaaaally sorry I didn't see the FAQ first... (although I swear I did!)

Thanks for your help! I LOVE JMS!

Nicole
