Cannot get latest version

Posted by IEDadmin1 - 2010/02/25 00:58

_____

http://www.jms2win.com/get-latest-version

Hello, this page does not work. I select the updated items I want to download, click "Get Latest Version" and instead of being able to download the items, I am redirected to this page: http://www.jms2win.com/index.php?option=com_pay2win&view=download&layout=list&Itemid=25

This page looks exactly like the first, so I try to download my items again and get sent here: http://www.jms2win.com/index.php#

Can you please fix this?

Thanks!
George

_____

When you select the check box and after click on the "get latest version" button, the result is an email sent in your mail box containing a new download ID.

It seems that the email has been correctly sent.
Perhaps it is in you spam box.

We have repeated and resent you new download ID.
