- * Unable to create the symbolic link -> .

Re: Unable to create the symbolic link Posted by edwin2win - 2010/06/04 10:23

This probably mean that the deploy directory where you want to deploy the slave already contain such physical directories that are not a link as you expect.

So JMS can not create the link and report you the error.

You have to check the deploy directory and when creating a new slave site this directory should be empty.
