twice login for two sites.

Posted by chetanmadaan - 2010/06/07 17:13

Edwin,

i replicated two websites and the problem is that i have to login to the second site even if i am logged into the both of them. same thing for admin login.

any tips where do i look for.

however, the in the administrator area. the logged in users are ok. i mean it shows the logged in users from both the sites.

Thanks

Perhaps you are using extension like VirtueMart or other login form that is not a native Joomla.
Perhaps you have a redirection to another URL like http to https or without www to www

Perhaps this is new in Joomla 1.5.16 or higher.
We know that Joomla changed login thing for the joomla 1.5.16 that have side effect.

---

well,

we are using the default joomla login.
sites are all with www and without https.

the site is 1.5.18

???

Check if you have the same behavior after you remove or comment a patch performed by Joomla as documented in their bug tracker

joomlacode.org/gf/project/joomla/tracker...racker_item_id=20221
joomlacode.org/gf/project/joomla/tracker...racker_item_id=20255

Try to Remove or put as comment the "session->fork()" at line 533 of libraries/joomla/application/application.php file.
