Sharing Users Question

Posted by qdevery - 2010/07/16 23:35

Hi I need a single sign in for multiple sites and want to use JMS 1.2 for Joomla to do this. I'm not clear if it will accomplish exactly what I'm looking for.

I want a master site that shares its user with the sub domain sites. I would like to allow registration on slave sites that is added to the master user list so they don't have to go to the master site to register. Is this possible and where can shared user log on?

==========
