Sharing Articles via Newsflash Module

Posted by davidr@capitalfortune.com - 2010/09/03 19:52

Does anyone know if JMS2Win allows you to share Joomla articles via a Newsflash module?

The reason for asking is that we have a standard text footer and contact us panel on all pages of all of our websites that we wish to maintain and update only once.

Thanks David

We have the "Multisites Content Modules" that include the multiisite version of latest news and news flash.
See our product detail
http://www.jms2win.com/download?page=shop.product_details&category_id=1&flypage=flypage.tpl&product_id=42

We also have a "Multisites Search" plugins that also works with Joomla 1.6
