Multisites disappeared

Posted by video1 - 2010/09/03 22:32

Hello Edwin,

We are having a serious problem with our Multisites module.
For some unknown reason Multi-Sites does no longer show up in the Components dropdown menu in the backend. Could you give me hint where to start looking for the cause of this problem?

Thanks a lot in advance.

Fixed!
For some reason mastersite was pointing to the wrong database prefix.
