Unable to create the alias. Perhaps it is already

Posted by javier011 - 2010/11/21 14:09

Hello,
I am trying to created my very first slave site, and I am having this when saving:
****
Unable to create the alias. Perhaps it is already used by another website.
****

And please what is the format should i use on that field? (Create an alias link:)

thanks.

J

In the "Alias Field" is a full path where you have to create the alias.
For example enter {root}/{site_alias} to create an alias in the root of your website.

The error message mean that the alias is already created or that you provide something that does not allow to create the alias.
