users can not login (not recognized) in slave

Posted by javier011 - 2010/11/21 21:50

Hello,

I have created my first slave,
I have created a login module in the slave site, but users are not recognized.

How to make the users from Master to be recognized in Slave??

thanks
J

If you want that a user is recognized in a slave site, you need to share the users.
See a sample presented in the tutorial video 13
http://www.jms2win.com/tutorial#jms12x-13

But that video is for replicate the sites,
i dont want to replicate the sites, I just want to share the users FROM MASTER TO SLAVE.

How to do it??

thanks

This is only possible with the replication.
It is impossible to share the users after that joomla has created the users.
This can only be done when cloning a website.

_____

What about this video?
http://tutorial.jms2win.info/jms12x/usersharing/index.html

If I am declaring in the template that the users's source is the Master?

wait a minute!, so if I understand, we can share users between SLAVE TO SLAVE ONLY?

in that case, that would be a good idea to duplicate the Master to Slave1 and then share users from Slave1 to Slave2 ??

thanks
